

# **AggregatorTAP**: Passive

100M | Portable | Aggregation and Power over Ethernet (PoE)

Network test access points (TAPs) are hardware tools that allow you to access and monitor your network. TAPs are purpose-built hardware devices that let you see every bit, byte and packet.®

AggregatorTAPs are used to capture 100% full duplex traffic that can then be sent to multiple monitoring appliances to analyze your network. This AggregatorTAP supports aggregation and regeneration/SPAN modes, providing flexibility to manage your network.
