

# EtherScope® nXG vs. CyberScope™

NetAlly EtherScope nXG and CyberScope – two excellent handheld tools designed to address different (but sometimes overlapping) use cases:

- EtherScope nXG is the right solution for anyone responsible for maintaining peak network and application performance.
- CyberScope is the world’s first handheld cyber security analyzer, has capabilities tailored to cybersecurity teams, enabling them to perform comprehensive site security assessment, analysis, and reporting. By tightly integrating Nmap with other features, CyberScope is the perfect solution for securing site networks.
